ID	Task	Menu	Owner	Files/functi	Deliverable	Status	Iteration 2 Contributions		Timeline	
T1	User Profile		1 A	tasks_data.cpp/ taskCreateProfile(), user.cpp	Name, age, resting HR, max HR = 220 − age	stub	Vivian	Kai	Week 1	Iteration #01
T2	Start simulated workout		2 A	taskRunWorkout(), sensor.cpp	Generates N readings for a chosen activity	stub	Define all tasks	Userprofile	Week 2	Iteration #02
T3	View Latest Readings		3 A	taskViewLatestt()	Prints the last few readings	stub	Come up with system ideas	Started HeartRate Sensor		
T4	Save Data		4 A	taskSave(), filemanager.cpp	Writes profile and log to a text file	stub	Creating main such as menu and cases	Modified System Ideas		
T5	Load Data		5 A	taskLoad(), filemanager.cpp	Reads the file back in	stub				

T6	View full inventory	6	B	tasks_analysis.cpp / taskViewHistory(), readinglog.cpp	Table of time, BPM, activity	stub
T7	Statistics	7	B	taskStatistics()	Min, max, average BPM	stub
T8	Heart Rate Zones	8	B	taskZoneSummary()	Percentage of readings per zone	stub
T9	Alerts	9	B	taskAlerts(), alert.cpp	Flags readings too high or too low	stub
T10	Menu and Exit	10	B	main.cpp	Menu with switch, clean exit	done
